

# GROWTH PORTFOLIO

Inception Date 2.01.2010  
Portfolio Minimum \$100,000

## METHODOLOGY

By combining no-load mutual funds, low-expense Exchange Traded Funds (ETFs) and exposure to targeted niche areas with attractive valuations, we believe we can effectively seek a higher risk-adjusted return than would be possible from mutual funds or ETFs alone.

The Growth Portfolio is a globally diversified, managed portfolio seeking growth of capital over a market cycle. It includes equity and debt mutual funds and ETFs. A typical portfolio may have up to 90% equity exposure from about 20 positions of both index products and actively managed mutual funds. Growth of capital is the goal while income is low.

## ASSET ALLOCATION<sup>a</sup>

■ Cash	6.07%
■ US Stocks	76.55%
■ Non-US Stocks	13.15%
■ Bonds	3.64%
■ Other	0.59%

## **Growth Portfolio**

**Salzinger Sheaff Brock**

Salzinger Sheaff Brock, LLC (“SSB”) is a federally registered investment adviser founded in 2009. SSB fees are available upon request and may be found in our Form ADV Part 2A. Performance data quoted herein represents past performance. **Past performance does not guarantee or indicate future results.** To determine if this strategy is appropriate for you, carefully consider the investment objectives, risk factors, and expenses before investing. Individual account management and construction will vary depending on each client’s investment needs and objectives. Investments employing SSB’s strategies are NOT insured by the FDIC or by any other Federal Government Agency, are NOT Bank deposits, are NOT guaranteed by any Bank or any Bank affiliate, and MAY lose value, including possible loss of principal.

Performance information shown for the composite is presented gross and net of actual investment management fees. Returns have been reduced by transaction costs and include the reinvestment of investment income (dividends/interest). Valuations and returns are stated in US dollars. Trade date accounting is used. Portfolio returns are calculated using time weighted return methodology on a monthly basis. Composite results consist of all client accounts that are, at a minimum, 80% invested in the strategy and invested for a full month or more. The composite description and the policies for valuing portfolios, calculating performance and preparing composites is available upon request.

The Growth Portfolio composite was created February 1, 2010. The Growth Portfolio consists of fully discretionary portfolios, including those accounts no longer with the firm. The investment objective of the portfolio is capital appreciation. Portfolio invests in approximately 20 low expense ETFs and actively-managed mutual funds. The composite is measured against a blended benchmark consisting of 90% Lipper Global Multi-Cap Core Index/10% Lipper General Bond Fund Index.

**Lipper Global Multi-Cap Core Index** are funds that invest in a variety of market capitalization ranges without concentrating 75% of their equity assets in any one market capitalization range over an extended period of time. Multi-cap funds typically have 25% to 75% of their assets invested in companies both inside and outside the U.S. **Lipper General Bond Fund Index** are funds which do not have quality or maturity restrictions. The funds intend to keep a bulk of their assets in corporate and government debt issues.

*An index should only be compared with a mandate that has a similar investment objective. An index is not available for direct investment and does not reflect any of the costs associated with buying and selling individual securities or management fees.*
